

# Take it to Go!

Feeding our students and saving food one apple at a time

---

When students are eating a school meal on campus and they do not get a chance to eat their **fruit, vegetable or grain** from the meal, they may place their item(s) in their backpack to save and eat later.

We want to encourage this **Take it to Go!** practice with our students, as it helps reduce food waste and allows students to enjoy their food later when they are hungry.

**Take it to Go!** is only for these three types of food (fruit, vegetable or grain). It does not apply to milk and any cold or hot item, due to health and safety issues and requirements.
